

COMPUTERS IN HUNTLY HOMES

Twelve families have completed 10 weeks of computer training at Huntly Primary School – and they get to take home and keep the computer they have been training on.

HAND-OVER: KING FAMILY WITH THEIR COMPUTER

They were participating in the Computers in Homes scheme. Each family receives a virus-protected home PC with six months' free Internet access – thanks to a \$25,000 donation from CA and additional money from the 2020 Communications Trust.

"It's hard for well-off New Zealanders to imagine how limiting it is not to have computer or Internet access at home," said Lorraine Bristol, Acting Principal at Huntly Primary.

CA New Zealand Country Manager Stuart Preston said the sponsorship reflected the type of community involvement CA participates in worldwide.

"We are doing a lot of work in the education sector in New Zealand and when we heard about the Computers in Homes programme we were keen to get involved," he added.
